# Previous Study: Regression Results

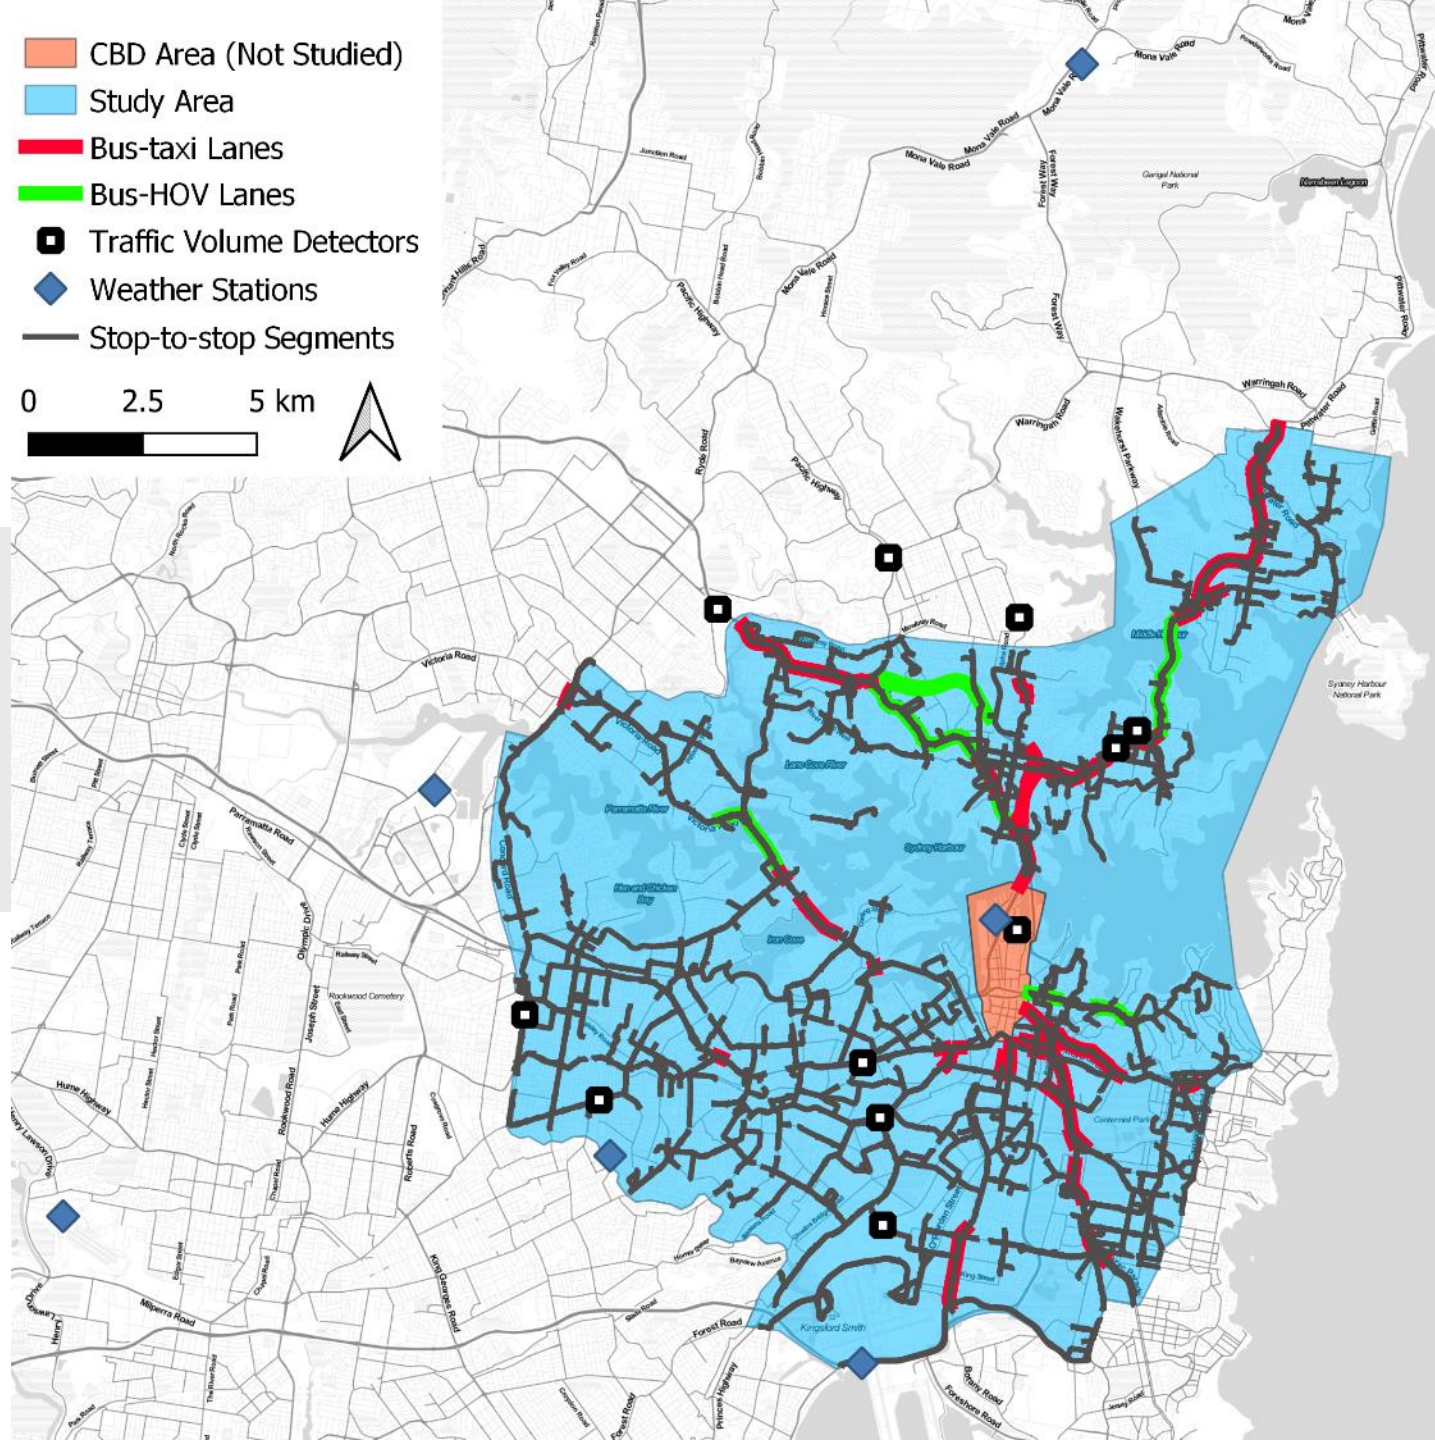

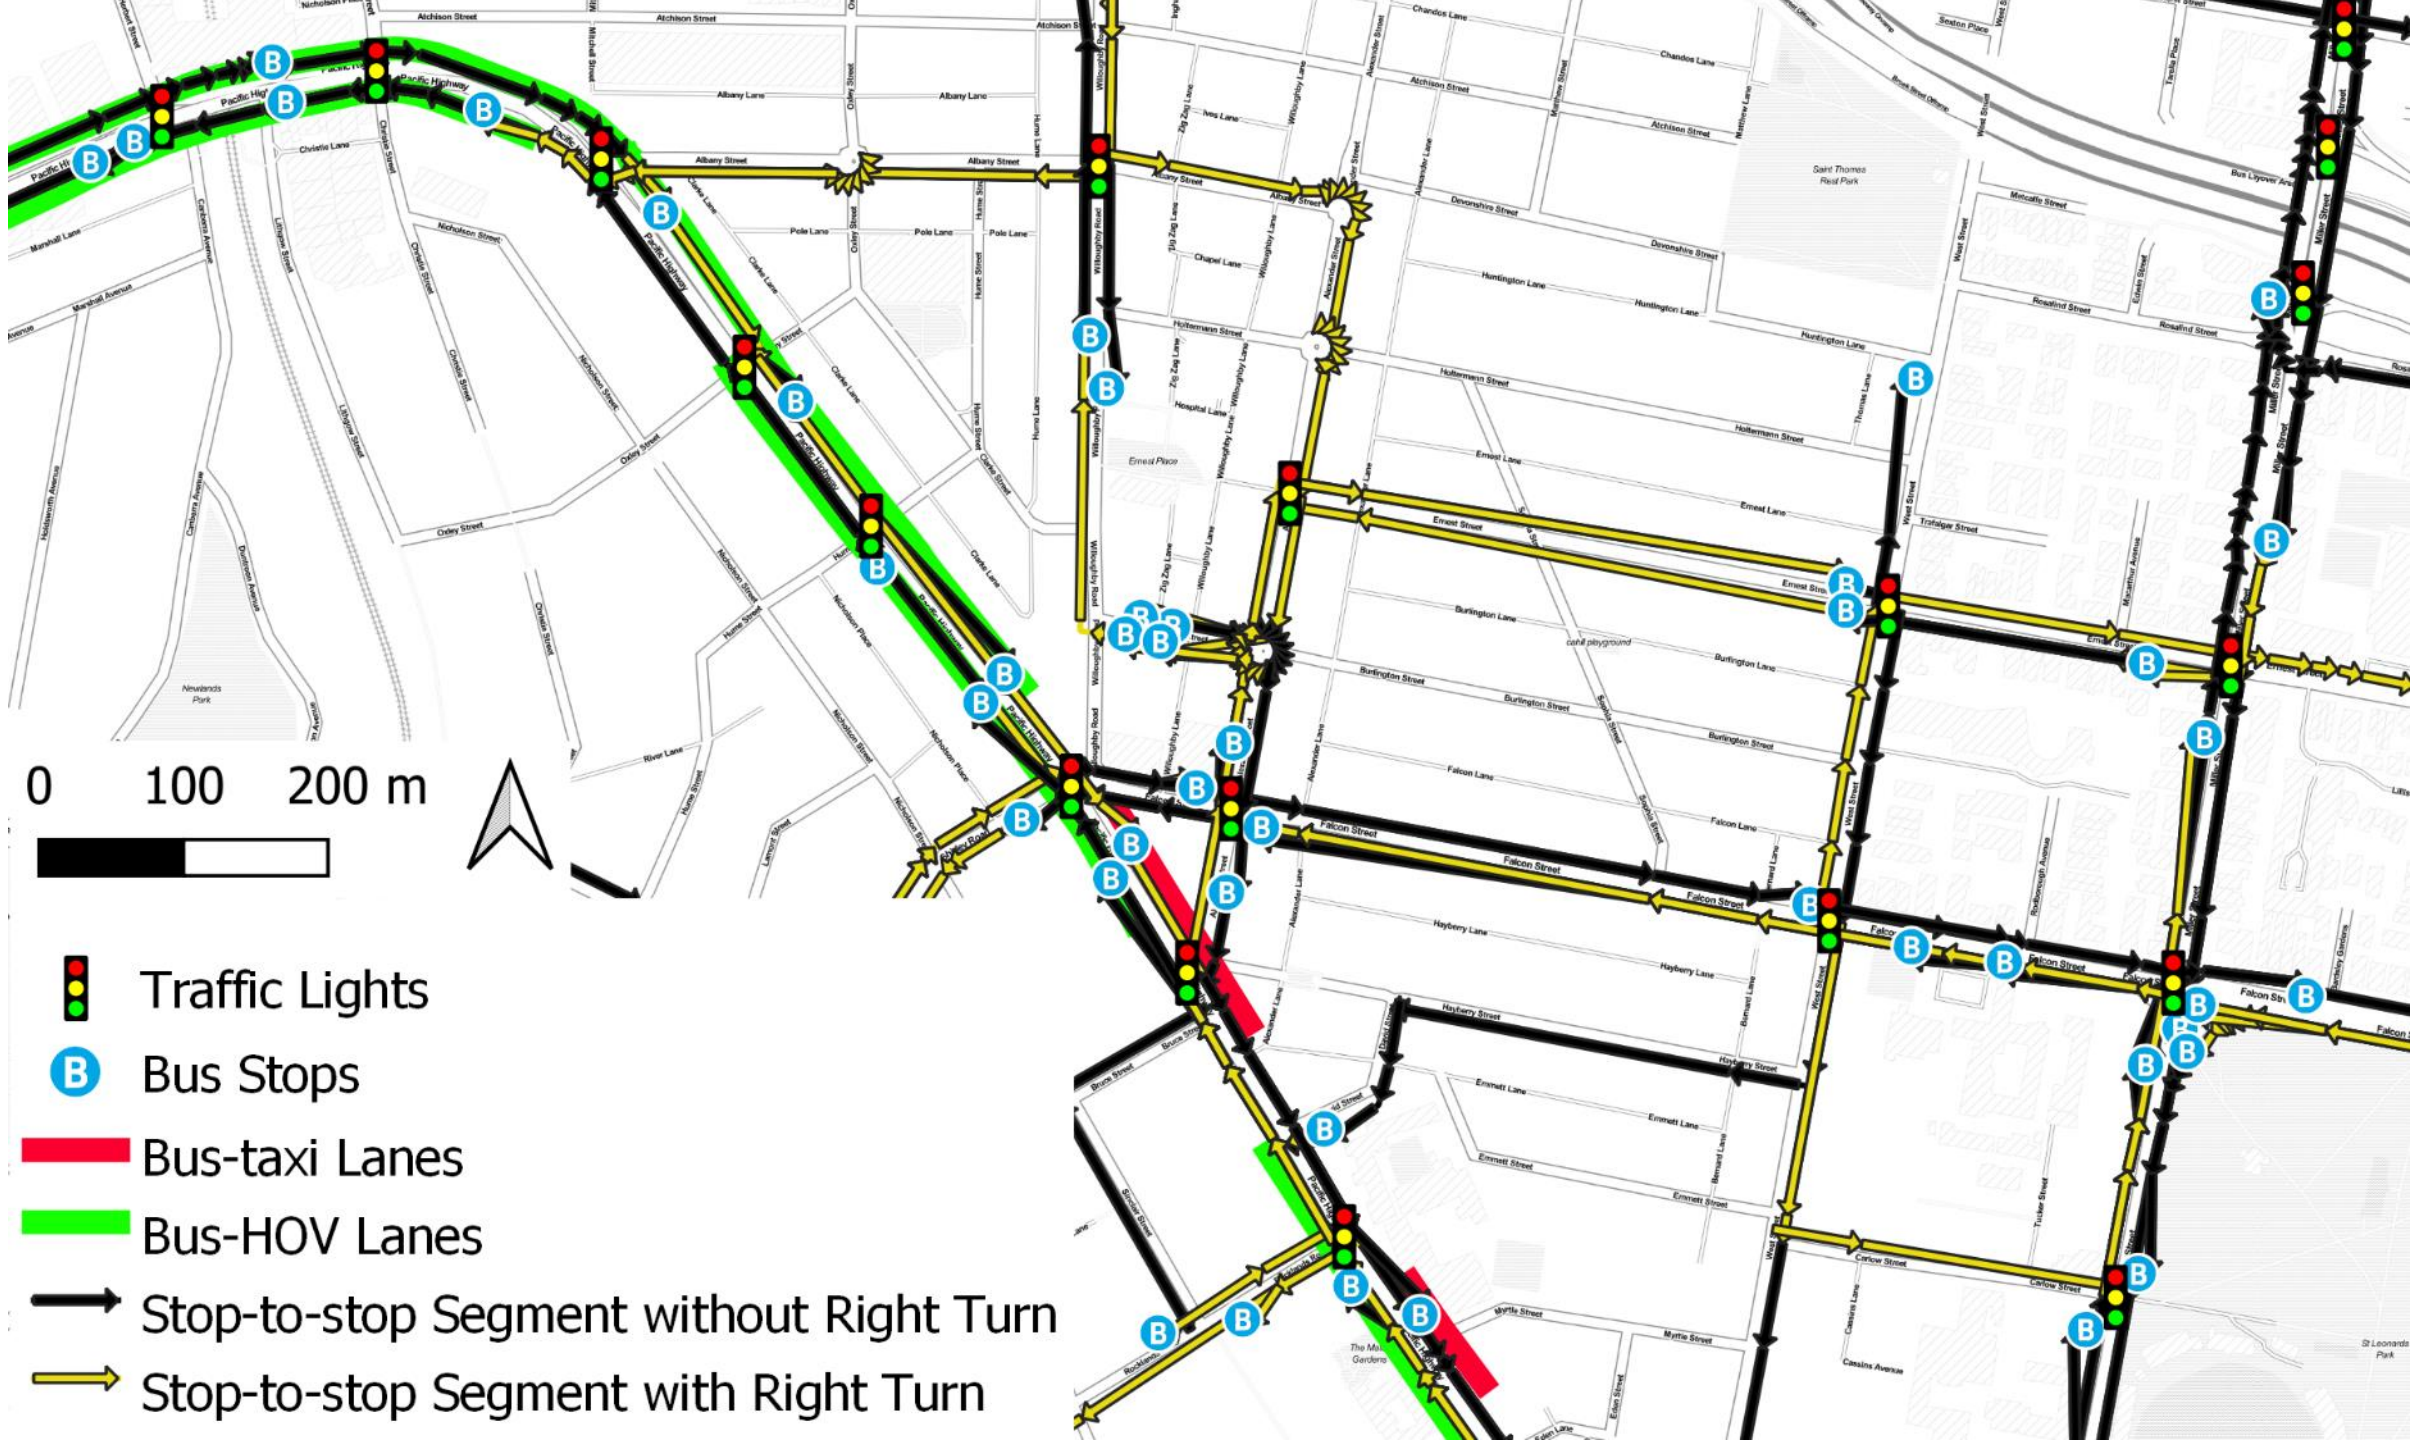

THE UNIVERSITY OF  
SYDNEY

# Study Area

-  CBD Area (Not Studied)
-  Study Area
-  Bus-taxi Lanes
-  Bus-HOV Lanes
-  Traffic Volume Detectors
-  Weather Stations
-  Stop-to-stop Segments

0 100 200 m

-  Traffic Lights
-  Bus Stops
-  Bus-taxi Lanes
-  Bus-HOV Lanes
-  Stop-to-stop Segment without Right Turn
-  Stop-to-stop Segment with Right Turn

# Panel Regression Model

$$\Delta_{it} = \alpha_i + \beta_B B_i + \beta_H H_i + \beta_S S_i + \beta_D D_t + \beta_T T_{it} + \beta_V V_{it} + \beta_L L_i + \beta_{RT} RT_i + \beta_{RF} RF_i + \beta_W W_i + \beta_{PH} PH_i + \beta_{SH} SH_i + \beta_{SI} SI_i + \epsilon_{it}$$

Symbol	Name	Units
$\Delta_{it}$	Marginal delay change at link $i$ time $t$	Seconds
$\alpha_i$	Link-specific effects	
$\beta$	Fitted coefficients	
$B_i$	Bus-taxi lane length on link $i$	$km$
$H_i$	Bus-HOV lane length on link $i$	$km$
$S_i$	Number of traffic signals on link $i$	
$D_t$	Traffic flow at time $t$	$10^3$ veh/(hour $\times$ lane)
$T_{it}$	Scheduled travel time on link $i$ at time $t$	s
$V_{it}$	Scheduled Travel speed on link $i$ at time $t$	km/h
$L_i$	Length on link $i$	$km$
$RT_i$	Right turn on link $i$	
$RF_i$	Rainfall on link $i$ at time $t$	mm
$W_i$	Weekend at time $t$	
$PH_i$	Public Holiday at time $t$	
$SH_i$	School Holiday at time $t$	
$SI_i$	COVID stringency index at time $t$	
$\epsilon_{it}$	Error term	

## Stop-to-stop Marginal Delay Mean Fixed-effects Panel Regression Results

Variable	Coefficient	Std. Err.	P-value
Bus-taxi lane Length	-6.1557	0.0516	0.0000
Bus-HOV lane Length	-7.1653	0.0690	0.0000
Number of Traffic signals	2.5920	0.0076	0.0000
Traffic Flow	5.0509	0.0337	0.0000
Cross-traffic Turn	26.232	0.0208	0.0000
Scheduled Travel Time	-0.4373	0.0002	0.0000
Link Length	30.384	0.0339	0.0000
Precipitation	-0.1582	0.0087	0.0000
Weekend	-0.6852	0.0185	0.0000
Public Holiday	-1.7229	0.0501	0.0000
School Holiday	-2.2104	0.0187	0.0000
COVID Stringency Index	-0.1354	0.0003	0.0000
Number of observations	15962428		
$R^2$	0.5263		

# Stop-to-stop Marginal Delay Mean Effects

10.1 × Traffic Lights

519 veh  
per lane per hour

Right Turn

165 mm rainfall  
per hour

## Stop-to-stop Marginal Delay Std Pooled Panel Regression Results

Variable	Coefficient	Std. Err.	P-value
Bus-taxi lane Length	-12.564	0.0407	0.0000
Bus-HOV lane Length	-5.5584	0.0560	0.0000
Number of Traffic signals	0.9709	0.0065	0.0000
Traffic Flow	14.195	0.0281	0.0000
Scheduled Travel Time	0.1772	0.0001	0.0000
Scheduled Speed	0.4437	0.0009	0.0000
Cross-traffic Turn	12.902	0.0171	0.0000
Precipitation	0.4112	0.0072	0.0000
Weekend	-1.8418	0.0154	0.0000
Public Holiday	-0.6829	0.0414	0.0000
School Holiday	0.4149	0.0155	0.0000
COVID Stringency Index	0.0854	0.0003	0.0000
Number of observations	15962428		
$R^2$	0.7345		

# Stop-to-stop Marginal Delay Std Effects

Right Turn

13.3 × Traffic Lights

908 veh  
per lane per hour

31 mm rainfall  
per hour

# Statistical Significance

THE UNIVERSITY OF  
SYDNEY

# Stop-to-stop Marginal Delay Mean Comparison

**Two-Sample T-test:**

**T-statistics value: 699.60**

**P-Value: 0.00**

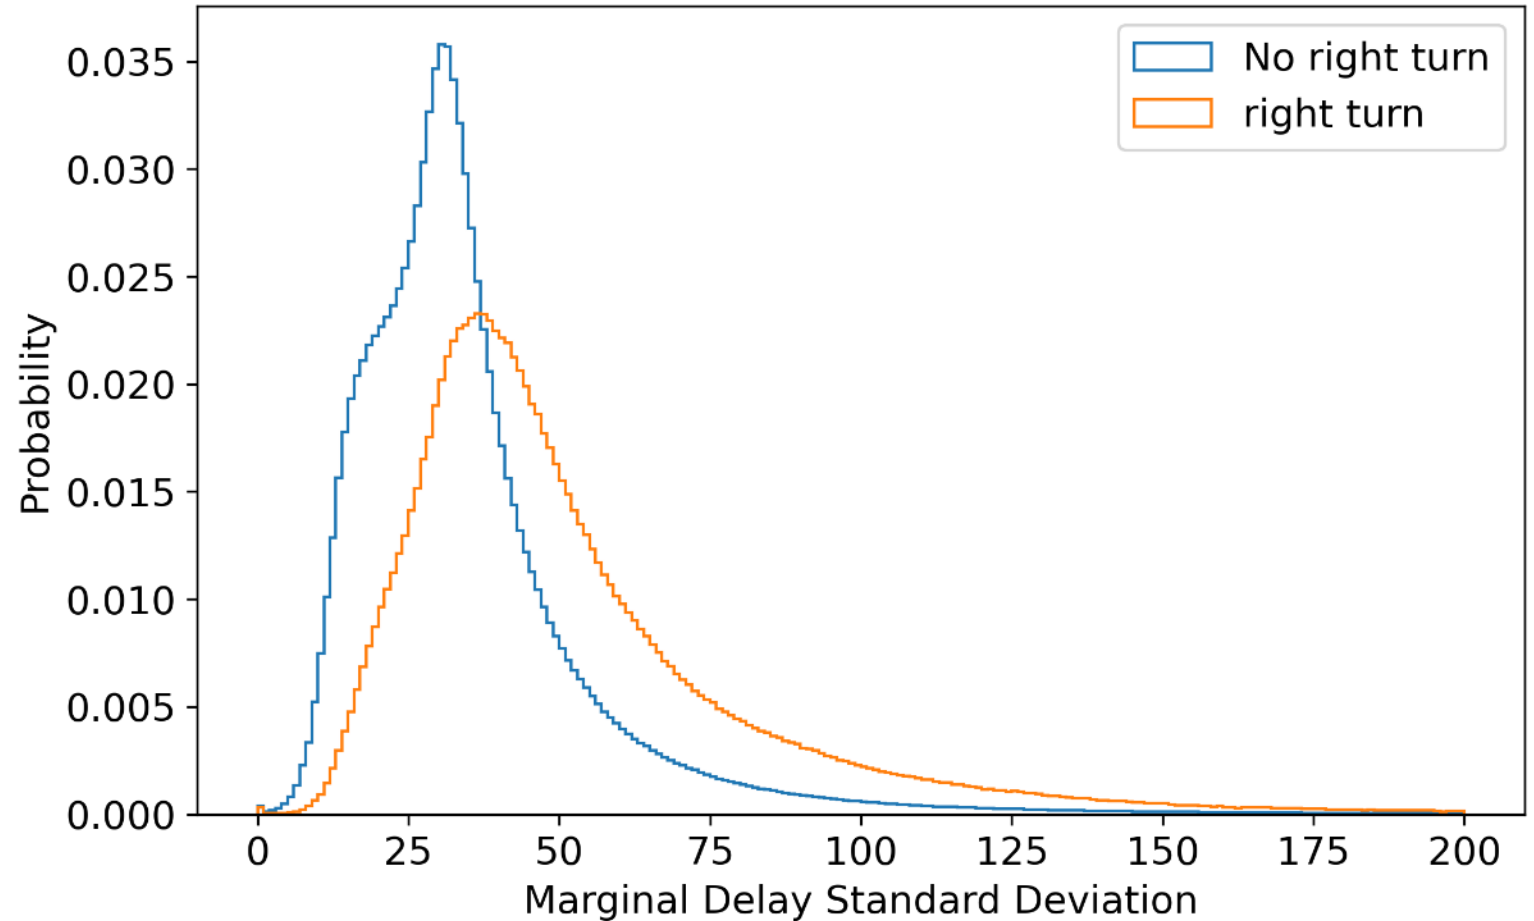

# Stop-to-stop Marginal Delay Std Comparison

**Two-Sample T-test:**

**T-statistics value: 1055.26**

**P-Value: 0.00**

# Stop-to-stop Speed Comparison

**Two-Sample T-test:**

**T-statistics value: 823.10**

**P-Value: 0.00**
